22 January 2015

MEMORANDUM FOR 103D AIRLIFT WING and 103D AIR CONTROL SQUADRON PERSONNEL

FROM: 103AW/CC

SUBJECT: ENVIRONMENTAL COMMITMENT STATEMENT

1. The 103d Airlift Wing of the Connecticut Air National Guard and its Geographically Separated Unit (GSU) are committed to the protection of human health and the environment as it accomplishes its stated mission:

“Maintain the highest caliber of trained personnel and equipment to accomplish the USAF mission, ‘Fly, Fight, and Win.’ Provide to the State of Connecticut trained and equipped personnel to protect life and property, and preserve the peace, order and public safety. Add value to our communities by involvement in local and state programs.”

2. The 103d Airlift Wing is dedicated to the development, implementation and thorough documentation of an installation-wide Environmental Management System (EMS) designed to assure compliance with applicable federal, state, local and Air Force-specific environmental regulations and policies.

3. The 103d Airlift Wing is committed to pollution prevention, and to continual improvement of its environmental management practices and programs. Significant environmental aspects of the unit’s operations have been identified, objectives set for improving or maintaining these aspects and specific task (target) defined. The cyclical EMS process of “Plan, Do, Check, and Act” will result in continuous improvement to the 103d Airlift Wing’s environmental programs. The effectiveness of process change will be tracked and discussed at Environmental, Safety and Occupational Health Council (ESOHC) meetings, if necessary, to ensure attainment of stated target.

4. This Environmental Commitment Statement (ECS) will be communicated to persons working for or on behalf of the 103d Airlift Wing while on the installation and will be made available to the public via the public Bradley ANG website. The ESOHC, as part of the EMS management review process, will review the ECS annually and modify as necessary to reflect changes in the installation’s mission or changes in the scope of the EMS. The updated ECS will be communicated as stated above.

FRANCIS N. DETORIE, Col, CTANG  
Commander, 103d Airlift Wing
